

# On the Train Towards the Future!

a proposed communications programme about sustainable mobility, climate change and carfree cities

In Budapest and towns along the railway lines to Pusztaszabolcs, Székesfehérvár and Tatabánya, the FLIRT becomes a “sustainability ambassador” for best practice examples in mobility and urban design from Switzerland:

- *Internalisation of costs of road freight* • *Integration of cycling with rail*
- *Complementary system of buses and rail* • *Bike-friendly businesses*
- *Carfree areas* • *Biogas fuel programmes* • *Carsharing*
- *Slow Up* • *Areas accessible by electric vehicles only*
- *The importance of a complete “mobility chain”*
